

Note: Loci will **never** email or direct message addresses to anyone. The only way to get the sale address is via the Loci dashboard at <https://sale.locipro.com>. If you visit our website, please confirm the website is either <http://www.locipro.com>. Anything outside of these websites is not affiliated with Loci at all and could be of malicious intent.

Hello!

First of all, thank you for choosing to support us here at Loci! You are taking part in a new and exciting chapter of our platform to revolutionize the way the world invents! So, we want to make sure you are ready for the token sale and here's what we need you to do before, during and after the sale!

Are you new to crypto? If so, then start here, if not, skip ahead to #2 on the next page.

1. How do I get into this thing?

Opportunities like our token sale have drawn a lot of interest from outside the normal crypto users, which is very exciting, but this space can seem very intimidating and complicated. We don't want that to be a barrier, which is why this is here! First off, you need to take your normal "fiat" currency, maybe Euros or Dollars, and use them to buy some ether!

Ether (ETH) is the native currency for the Ethereum platform. This platform is built on a blockchain, like bitcoin, but has other the ability to run things called smart contracts. Smart contracts are basically code written to do things in the crypto world and will drastically change how things go in the blockchain world. We are using audited, secure smart contracts for our sale in order to protect you and ensure that you receive what you have purchased safely!

After you have purchased some ETH, you must move it away from your exchange account.

YOU CANNOT SEND US ETH DIRECTLY FROM AN EXCHANGE, YOU WILL LOSE YOUR TOKENS

That process is very straightforward, sometimes called a transfer or a withdrawal, you need to move your ETH to a wallet that you control, and one that will work with ERC20 tokens, like ours!

After the ether (ETH) is in your new wallet, you completely control it, as opposed to when an exchange controls it, and you are able to contribute to the sale! We highly suggest you prepare your wallet as far ahead of time as possible.

To summarize:

1. Join an exchange, like Coinbase or Bitstamp and finish the signup process.
2. Purchase ether (ETH) on the exchange
3. Create a new wallet that supports ERC20 tokens, like MyEtherWallet or Metamask
4. Transfer your ETH to your wallet

5. Await the start of the sale or join the sale if it has already started!

Need extra help? Don't have a wallet setup? Here is a step by step guide on [how to setup a new Wallet on MyEtherWallet](#). Here is a [guide on how to send Ethereum](#) with MyEtherWallet. They also have a [video guide](#) here.

2. Make Sure to Have Your Ether Wallet Setup

The only way to participate will be to send funds directly to our smart contract address. You will need to send ETH from a wallet that accepts ERC20 tokens like ours. For example, you may use wallets such as MetaMask, MyEtherWallet, or Mist.

- We will make the contract address public on our website when the sale begins.
- You will receive your LOCIcoin tokens to the same address from which you sent the funds.
- Note: On the day of the sale, transaction times may be slow. Please prepare your ether early!

3. Token Sale Begins! (Round 1)

The LOCIcoin Token Sale first round will open starting December 5, 7pm Eastern US time.

- The first round is only open to those who registered on the whitelist and new registrations will not be allowed once the sale begins.
- On our token sale site: <https://sale.locipro.com> you will be prompted to sign in with your email address and wallet address that you registered with, it must match your registration
- If you have any issues or questions, please use the support chat on the website, or email us at tokensale@locipro.com
- Verify you have this information handy before the sale begins as support volume delays may occur.

4. Main Sale Begins! (Rounds 2-4)

The LOCIcoin Token Sale second round will start at December 7, 7pm Eastern US time and does not require pre-registration.

- On our token sale site, you will register with the following information: first and last name, email address and wallet address. The wallet address must match the address you will be sending ETH from and receiving the tokens in return.
- As long as tokens are still available, the sale will continue through the rounds until we hit our hard cap of 50M tokens or \$19M in ether.

5. Transfer Your Desired Amount of Ether

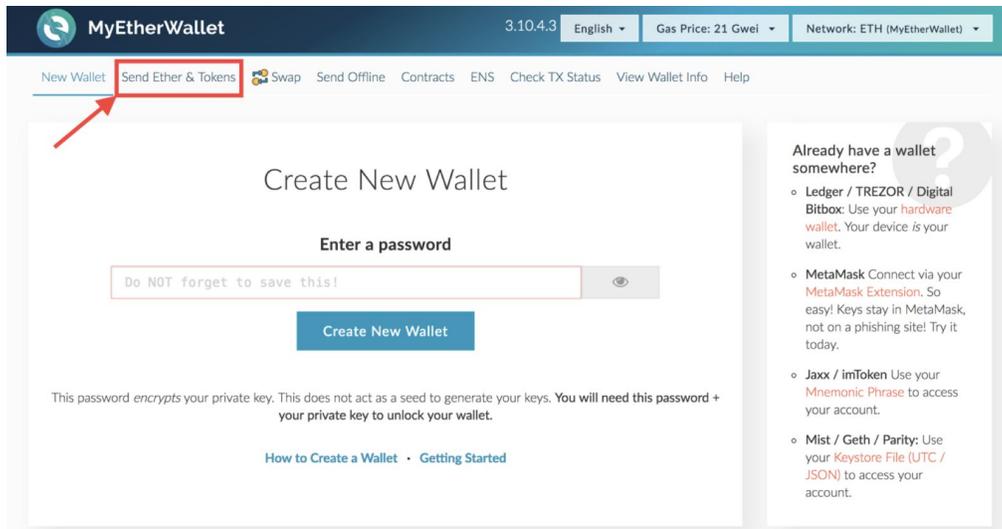

- From your own wallet, transfer the desired amount of Ether (ETH) to the token sale address shown to you. Please only send your desired amount of ETH from a wallet that accepts ERC20 tokens.
- Please note, this post is not an endorsement of specific wallets as a means to manage your ETH. We cannot guarantee the correct behavior of wallets you use for managing your digital assets.

- Do NOT send ether from an exchange address (such as Coinbase, Bittrex or Bitstamp). You will lose your tokens.
- If you have your ETH on an exchange or hosted wallet, you MUST transfer it to an ERC20 Compatible wallet prior to contributing.

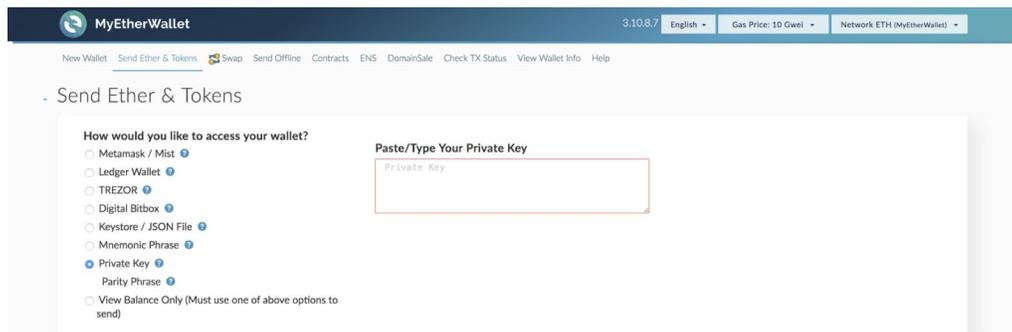

How do you send ether to Loci?

There are a number of ERC20 compatible wallets that you can use to send ETH. We are showing an example of the process below with MyEtherWallet.

As an example: If you are using [MyEtherWallet.com](https://myetherwallet.com) for managing your ether, go to the [Send Ether & Tokens](#) section and enter the smart contract address that you have confirmed from the Loci website, the amount of ether you want to send, and generate and send the transaction.

Go to the [Send Ether & Tokens](#) section.

Unlock your wallet with whatever method you've established.
